

Washing instructions

At the board. Washing is on the other sheet.
Generic front loader, 1–8 kg · Generic steam iron

The ring is the iron's thermostat as it sits on the dial, and the red pointer is where to turn it. The blue band is the zone where it makes steam; a setting below it is a dry iron. A crossed-out ring means leave the iron in the cupboard.

1. ●● — wool, silk · 150 °C

3 piles

Thermostat on ●●
inside the steam zone

HOW

- Dark**
Merino Wool
Cashmere Blend
- Inside out, medium heat. Steam, don't press hard — shine on dark cotton doesn't come out.
Only if you must: pressing cloth, no weight. Hanging it in a steamy bathroom drops the creases without touching it.
Low heat through a pressing cloth. Better still, steam it on a hanger and let the creases drop out on their own.

2. ●●● — cotton, linen · 200 °C

3 piles

Thermostat on ●●●
inside the steam zone

HOW

- White**
Coloured
Denim
- Iron while slightly damp, steam on. Cotton takes all the heat the iron has.
Steam, but turn prints and dark panels inside out first.
Inside out on cotton heat if you want them crisp. Steam.

3. MAX — linen · 230 °C

1 pile

Thermostat on MAX
inside the steam zone

HOW

- Linen**
- While still damp, hottest setting, steam first.

4. Do not iron

10 piles

Leave the iron off
nothing on this card ever goes near the board

NEVER THESE

- White Socks**
White Towels
Coloured Socks
Coloured Towels
Microfibre Towels
Black Socks
Raw Denim
Synthetic Activewear
Gym Socks
Wool Trainers
- Ironing crushes the pile flat and the towel stops drying you.
Ironing crushes the pile flat and the towel stops drying you.
Polyester and polyamide start melting around 110 °C, well before the iron does anything useful.
Pressing sets creases in the wrong places and flattens the fades that took months to earn.
Elastane starts degrading around 110 °C, and the technical finish goes with it.
