Washing instructions

Getting it into the machine, loving is on the other sheet. Socks and underwear, 40° is fine. Wash wool on cold.

LOADS — ONE LINE, ONE WASH

Cottons 95°	**White + White Socks**
Cottons 60°	**Coloured + Coloured Socks** (on its own)
Cottons 40°	**Coloured + Coloured Socks**
Cottons 30°	Coloured Socks + Jeans (on its own)
Easy Care 40°	Microfibre Towels (on its own)
Delicates 40°	**Dark + Black Socks + Denim**
Delicates / Silk cold	Raw Denim (on its own)
Wool 30°	**Merino Wool + Cashmere Blend**
Synthetics 30°	Synthetic Activewear (on its own)
Sportswear 40°	Gym Socks (on its own)
Wool cold	Wool Towels (on its own)
Easy Care 40°	Linen (on its own)

The dials are drawn as they sit on the machine: twice-a-block is Off, and the red point is the start button. A Chaos Wave means you've the display stops mixing. Wash it on the inside.

1. White + White Socks

-2.30

NO SOTTENDO Cottons 60 °C · 1200 rpm

DETERGENT
White: Universal powder, full dose — the bleach in powder is what keeps whites from going grey.
White Socks: Universal powder, full dose.

SPIN
White: Tumble dry normal, or line dry if the sun — sunlight bleaches whites for free.
White Socks: Tumble dry normal.

WASH TOGETHER WITH
White: Other whites.
White: Wash whites on their own. One stray coloured sock is all it takes.
White Socks: Same as White — throw them in that load.

2. White Towels

-2.30

NO SOTTENDO Cottons 60 °C · 1400 rpm

DETERGENT
Universal powder, full dose. Go lighter rather than heavier: excess detergent stiffens terry.

SPIN
Tumble dry medium — tumbling is what fluffs the pile back up.

WASH TOGETHER WITH
Nothing else — wash alone

NOTES
Never fabric softener: it coats the loops in silicone and the towel stops absorbing. White vinegar in the softener drawer once a month softens instead.

3. Coloured

-2.15

SOTTENDO OK Cottons 40 °C · 1200 rpm

DETERGENT
Coloured detergent — no bleach, no optical brighteners that wash out.

DRYING
Line dry inside out, or tumble on low.

WASH TOGETHER WITH
Coloured Socks

NOTES
Wash new or strongly dyed items separately for the first two or three washes.

4. Coloured Socks

-2.15

NO SOTTENDO Cottons 40 °C · 1200 rpm

DETERGENT
Coloured detergent

DRYING
Tumble dry low or line dry.

WASH TOGETHER WITH
Coloured

NOTES
Same settings as Coloured — throw them in that load.

5. Coloured Towels

-2.15

NO SOTTENDO Cottons 40 °C · 1400 rpm

DETERGENT
Coloured liquid detergent. Go lighter rather than heavier: excess detergent stiffens terry.

DRYING
Tumble dry medium — it kills absorbency from them at 60 °C every month or so if they start to smell.

WASH TOGETHER WITH
Nothing else — wash alone

NOTES
Never fabric softener — it kills absorbency from them at 60 °C every month or so if they start to smell.

6. Microfibre Towels

-1.30

NO SOTTENDO Easy Care 40 °C · 1200 rpm

DETERGENT
Liquid detergent, half dose. What doesn't rinse away stays in the split fibre and destroys anything up.

DRYING
Air dry, or tumble on low. High heat fuses the split ends shut and the towel never absorbs again.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Never fabric softener — it fills the split fibres with silicone and the towel is finished. Wash with microfibre only: the same split ends that make it absorbent grab cotton and shed it for hours.

7. Dark + Black Socks + Denim

-2.00

NO SOTTENDO Cottons 30 °C · 800 rpm

DETERGENT
Dark: Liquid detergent for dark/black — optical brighteners are what leave that grey haze.
Black Socks: Liquid detergent for dark/black.
Denim: Liquid detergent for dark/black.

SPIN
Dark: Tumble dry inside out, or if dried in sun: Strip the dryer. Neat holes black fastest.
Black Socks: Line dry, or tumble on low.
Denim: Hang by the waistband and air dry. A hot dryer shrinks and fades denim and destroys the elastane in stretch denim.

WASH TOGETHER WITH
each other

NOTES
Dark: Turn everything inside out. The extra rinse matters here — it's what stops dye bleeding onto the next wash.
Black Socks: Same settings as Dark — throw them in that load.
Denim: Inside out, zips and buttons closed. Wash them far less often than you think.

8. Raw Denim

-0.45

NO SOTTENDO Delicates / Silk cold · 400 rpm

DETERGENT
A capful of pH-neutral or denim-specific detergent. No bleach, no enzymes.

DRYING
Hang inside out indoors, away from sun and radiators. Never tumble.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Unwashed denim is meant to go months before its first wash. Wash it when it needs washing, a 40-minute rinse on the fabric inside out, no agitation, no wringing — then roll in a towel to press the water out.

9. Merino Wool + Cashmere Blend

-0.40

NO SOTTENDO Wool 30 °C · 400 rpm

DETERGENT
Merino Wool: Wool detergent, half dose. No enzymes, no bleach — they eat the fibre.
Cashmere Blend: Wool and cashmere detergent, half dose. No enzymes, no proteases, no bleach.

DRYING
Merino Wool: Never tumble dry. Dry flat on a towel, away from radiators and sun — hung up it stretches and never comes back.
Cashmere Blend: Never tumble dry. Squeeze the water out, never wring, then dry flat on a towel away from any heat.

WASH TOGETHER WITH
each other

NOTES
Merino Wool: Turn inside out, wash with wool only, nothing else. Cold water only. Avoid fabric softener — it coats the fibres and makes them scratchy.
Cashmere Blend: Inside out, and only ever with other wool. Cashmere pills when it rubs — that is the first sign of wear, normally not a fault; a cashmere comb takes it off. Check the blend first: a little nylon makes it tougher, silk makes it more delicate.

10. Synthetic Activewear

-1.10

NO SOTTENDO Sportswear 30 °C · 800 rpm

DETERGENT
Sports detergent, half dose. Fabric softener clogs the wicking and makes it smell worse, not better.

DRYING
Air dry on a hanger — dry within the hour. Tumble heat kills the stretch.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Inside out. Never softener: it films over the fibres these rely on for wicking and stench. A cup of white vinegar in the rinse drawer does the job instead. Wash after one wear, not two — bacteria have time to multiply, one wash Wash trainers on their own — they're the dirtiest. Wash gym socks on their own, too — they go inside-out and shrink the wool upper.

11. Gym Socks

-1.20

NO SOTTENDO Sportswear 40 °C · 1200 rpm

DETERGENT
Sports detergent, normal dose

DRYING
Tumble dry low or line dry.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Wash before they're worn every few weeks — 40 °C keeps them clean but doesn't reset the smell.

12. Wool Trainers

-0.40

NO SOTTENDO Wool cold · 400 rpm

DETERGENT
A small amount of mild detergent — a wool detergent is ideal. No bleach.

DRYING
Air dry only, somewhere with moving air outside, by a window, or in front of a fan. Never the dryer and never a radiator — heat warps the sole and shrinks the wool upper.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Pull the insoles and laces out first and wash those by hand. The shoes go in a mesh delicates bag or a pillowcase, on their own — a loose trainer batters the drum and everything else.

13. Linen

-1.90

NO SOTTENDO Easy Care 40 °C · 800 rpm

DETERGENT
Mild liquid detergent, no bleach — bleach yellows linen and breaks the fibre down over time.

DRYING
Line dry, or tumble low and pull out a little damp — bone dry looks creases in.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
New linen sheds a little diarrhoea for the first few washes — it's normal, and it settles down. Iron flax with either 40 °C seeds.

Washing instructions are machine-readable. Machine not included.
