OK — same drum L — one sheds lint onto the other C — colours would run into each other S — wash on its own P — different programme, temperature, spin or options

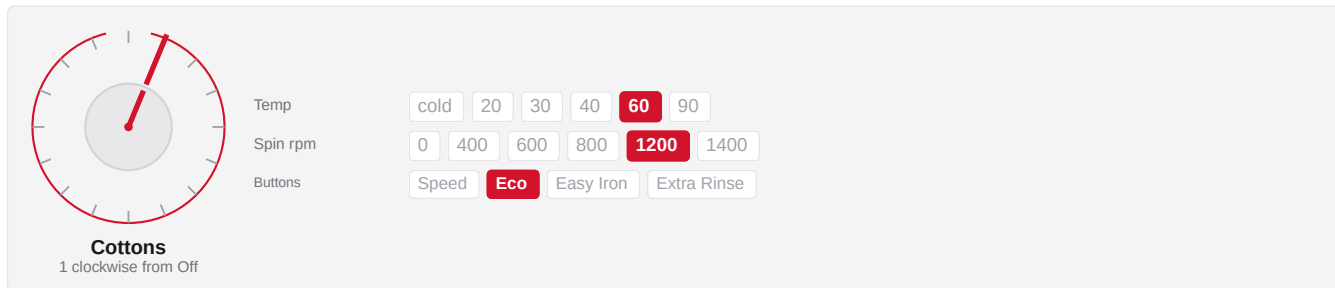

programme

The dials are drawn as they sit on the machine: twelve o'clock is Off, and the red pointer is where to turn it. Chips show every value the display steps through, filled in on the one you want.

1. White + White Socks

~2:30

NO SOFTENER Cottons 60 °C · 1200 rpm

The interface shows a dial with a red needle pointing to the 1 o'clock position, labeled 'Cottons' and '1 clockwise from Off'. To the right, there are three rows of controls:

- Temp:** cold, 20, 30, 40, **60**, 90
- Spin rpm:** 0, 400, 600, 800, **1200**, 1400
- Buttons:** Speed, **Eco**, Easy Iron, Extra Rinse

DETERGENT

White: Universal powder, full dose — the bleach in powder is what keeps whites from going grey

White Socks: Universal powder, full dose

DRYING

White: Tumble dry normal, or line dry in the sun — sunlight bleaches whites for free.

White Socks: Tumble dry normal.

WASH TOGETHER WITH
each other

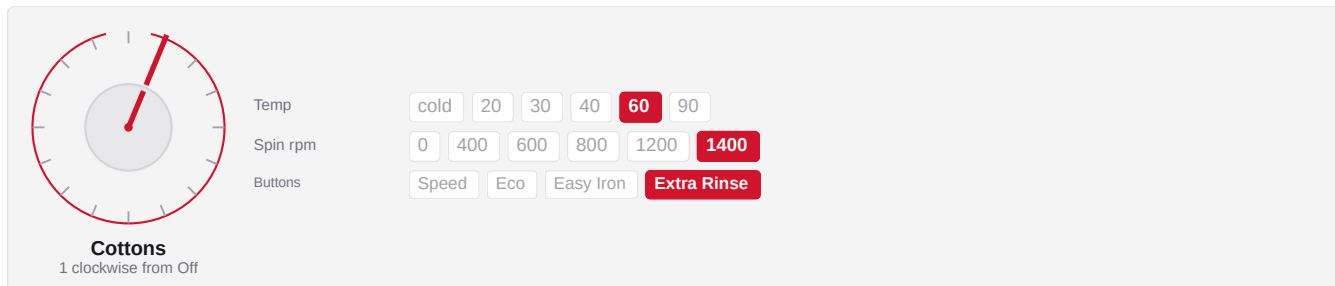

NOTES

White: Wash whites on their own. One stray coloured sock is all it takes.

2. White Towels

~2:30

NO SOFTENER Cottons 60 °C · 1400 rpm

The interface shows a dial with a red needle pointing to the 1 o'clock position, labeled 'Cottons' and '1 clockwise from Off'. To the right, there are three rows of controls:

- Temp:** cold, 20, 30, 40, **60**, 90
- Spin rpm:** 0, 400, 600, 800, 1200, **1400**
- Buttons:** Speed, Eco, Easy Iron, **Extra Rinse**

DETERGENT

Universal powder, full dose. Go lighter rather than heavier: excess detergent stiffens terry.

DRYING

Tumble dry medium — the tumbling is what fluffs the pile back up.

WASH TOGETHER WITH
nothing else — wash alone

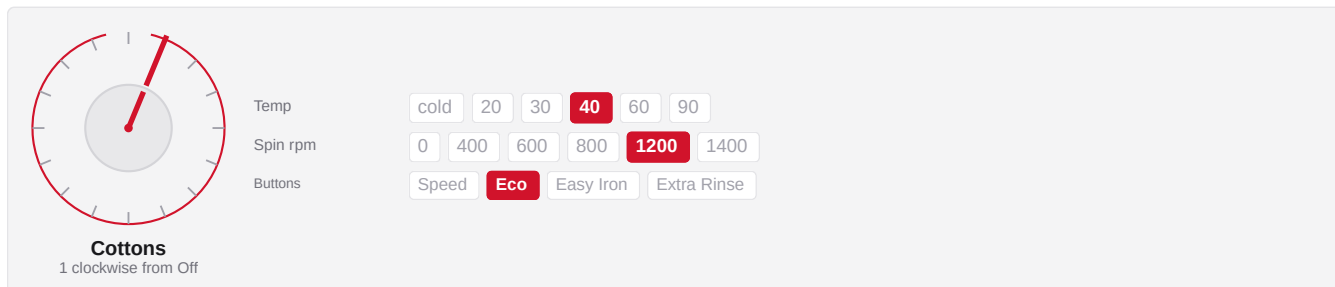

NOTES

Never fabric softener: it coats the loops in silicone and the towel stops absorbing. White vinegar in the softener drawer once a month softens instead.

3. Coloured

~2:15

SOFTENER OK Cottons 40 °C · 1200 rpm

The interface shows a dial with a red needle pointing to the 1 o'clock position, labeled 'Cottons' and '1 clockwise from Off'. To the right, there are three rows of controls:

- Temp:** cold, 20, 30, **40**, 60, 90
- Spin rpm:** 0, 400, 600, 800, **1200**, 1400
- Buttons:** Speed, **Eco**, Easy Iron, Extra Rinse

DETERGENT

Colour liquid detergent — no bleach, no optical brighteners

DRYING

Line dry inside out, or tumble on low.

WASH TOGETHER WITH
Coloured Socks

~2:15

WASH TOGETHER WITH
Coloured

~2:15

NOTES
Never fabric softener — it kills absorbency. Run them at 60 °C every month or so if they start to smell.

~1:30

NOTES

~2:00

[illegible]

Denim: Inside out, zips and buttons closed. Wash them far less often than you think.

~0:45

Delicates / Silk

6 clockwise from Off

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

Unwashed denim is meant to go months before its first wash. Gentler than the machine: a 45-minute cold soak in the bath, inside out, no agitation, no wringing — then roll in a towel to press the water out.

~0:40

[illegible]

Wool
7 clockwise from Off

DETERGENT
Merino Wool: Wool detergent, half dose. No enzymes, no proteases, no bleach — they eat the fibre.
Cashmere Blend: Wool or cashmere detergent, half dose. No enzymes, no proteases, no bleach.

DRYING
Merino Wool: Never tumble dry. Dry flat on a towel, away from radiators and sun — hung up it stretches and never comes back.
Cashmere Blend: Never tumble dry. Squeeze the water out, never wring, then dry flat on a towel away from any heat.

WASH TOGETHER WITH
each other

NOTES
Merino Wool: Turn inside out, wash with wool only, nothing with zips. Merino barely needs washing — air it overnight and wear it again.
Cashmere Blend: Inside out, and only ever with other wool. Cashmere pills where it rubs — that is the fibre behaving normally, not a fault; a cashmere comb takes it off. Check the blend first: a little nylon makes it tougher, silk makes it more delicate.

10. Synthetic Activewear ~1:10

NO SOFTENER Sportswear 30 °C · 800 rpm

Sportswear
14 clockwise from Off

Temp

Spin rpm

Buttons

cold 20 **30** 40 60 90

0 400 600 **800** 1200 1400

Speed Eco Easy Iron **Extra Rinse**

DETERGENT
A small dose of mild pH-neutral liquid detergent. Too much is what makes them smell.

DRYING
Air dry on a hanger — dry within the hour. Tumble heat kills the stretch.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Inside out. Never softener: it films over the fibres these rely on for wicking and stretch. A cup of white vinegar in the rinse resets a load that already smells. Covers tops, shorts and base layers — one fabric family, one wash. Mixed colours are fine in one run: at 30 °C the dyes on polyester barely move. The exception is a brand-new black or strong red piece, which can crock for a wash or two — give that its own run first.

11. Gym Socks ~1:20

NO SOFTENER Sportswear 40 °C · 1200 rpm

Sportswear
14 clockwise from Off

Temp

Spin rpm

Buttons

cold 20 30 **40** 60 90

0 400 600 800 **1200** 1400

Speed Eco Easy Iron **Extra Rinse**

DETERGENT
Liquid detergent, normal dose

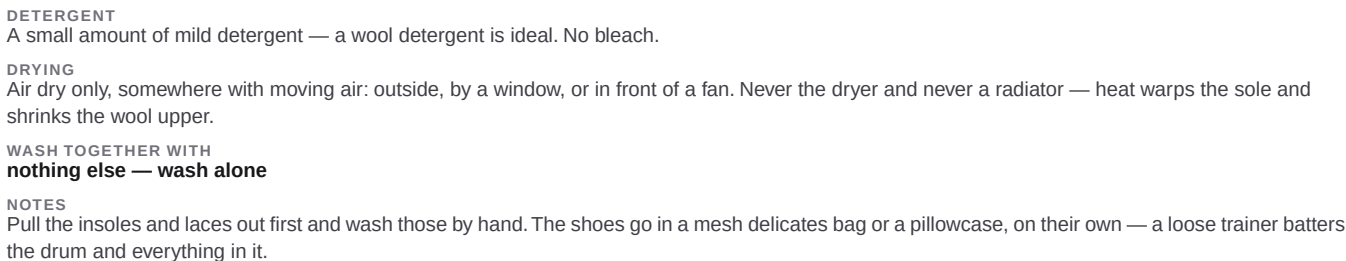

DRYING
Tumble dry low or line dry.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Give them a 60 °C cotton run every few weeks — 40 °C keeps them clean but doesn't reset the smell.

12. Wool Trainers ~0:40

NO SOFTENER Wool cold · 400 rpm

~1:30

NOTES
New linen sheds a little dye/lint for the first few washes — wash alone until it rinses clear, then fine with other 40 °C loads.
