OK — same drum L — one sheds lint onto the other C — colours would run into each other S — wash on its own P — different programme, temperature, spin or options

programme

The dials are drawn as they sit on the machine: twelve o'clock is Off, and the red pointer is where to turn it. Chips show every value the display steps through, filled in on the one you want.

1. White + White Socks

~2:30

NO SOFTENER Cottons 60 °C · 1200 rpm

Cottons
1 clockwise from Off

Temp

Spin rpm

Buttons

cold 20 30 40 **60** 90

0 400 600 800 **1200** 1400

Speed **Eco** Easy Iron Extra Rinse

DETERGENT
White: Universal powder, full dose — the bleach in powder is what keeps whites from going grey
White Socks: Universal powder, full dose

DRYING
White: Tumble dry normal, or line dry in the sun — sunlight bleaches whites for free.
White Socks: Tumble dry normal.

WASH TOGETHER WITH each other

NOTES
White: Wash whites on their own. One stray coloured sock is all it takes.
White Socks: Same settings as White — throw them in that load.

2. White Towels

~2:30

NO SOFTENER Cottons 60 °C · 1400 rpm

Cottons
1 clockwise from Off

Temp

Spin rpm

Buttons

cold 20 30 40 **60** 90

0 400 600 800 1200 **1400**

Speed Eco Easy Iron **Extra Rinse**

DETERGENT
Universal powder, full dose. Go lighter rather than heavier: excess detergent stiffens terry.

DRYING
Tumble dry medium — the tumbling is what fluffs the pile back up.

WASH TOGETHER WITH nothing else — wash alone

NOTES
Never fabric softener: it coats the loops in silicone and the towel stops absorbing. White vinegar in the softener drawer once a month softens instead.

~2:15

cold 20 30 **40** 60 90

0 400 600 800 **1200** 1400

Speed **Eco** Easy Iron Extra Rinse

1 clockwise from Off

Wash new or strongly dyed items separately for the first two or three washes.

~2:15

An analog clock face with a red border and 12 tick marks. The hour hand is positioned between 1 and 2, and the minute hand is pointing at 10.

cold 20 30 **40** 60 90

0 400 600 800 **1200** 1400

Speed **Eco** Easy Iron Extra Rinse

1 clockwise from Off

Same settings as Coloured — throw them in that load.

5. Coloured Towels

~2:15

NO SOFTENER Cottons 40 °C · 1400 rpm

The control panel features a rotary dial on the left with a red needle pointing to the 'Cottons' position, which is 1 clockwise from 'Off'. To the right of the dial are three rows of buttons. The first row, labeled 'Temp', includes buttons for cold, 20, 30, 40 (highlighted in red), 60, and 90. The second row, labeled 'Spin rpm', includes buttons for 0, 400, 600, 800, 1200, and 1400 (highlighted in red). The third row, labeled 'Buttons', includes buttons for Speed, Eco, Easy Iron, and Extra Rinse (highlighted in red).

Cottons
1 clockwise from Off

DETERGENT
Colour liquid detergent. Go lighter rather than heavier: excess detergent stiffens terry.

DRYING
Tumble dry medium — the tumbling is what fluffs the pile back up.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Never fabric softener — it kills absorbency. Run them at 60 °C every month or so if they start to smell.

6. Microfibre Towels

~1:30

NO SOFTENER Easy Care 40 °C · 1200 rpm

The control panel features a rotary dial on the left with a red needle pointing to the 'Easy Care' position, which is 3 clockwise from 'Off'. To the right of the dial are three rows of buttons. The first row, labeled 'Temp', includes buttons for cold, 20, 30, 40 (highlighted in red), 60, and 90. The second row, labeled 'Spin rpm', includes buttons for 0, 400, 600, 800, 1200 (highlighted in red), and 1400. The third row, labeled 'Buttons', includes buttons for Speed, Eco, Easy Iron, and Extra Rinse (highlighted in red).

Easy Care
3 clockwise from Off

DETERGENT
Liquid detergent, half dose. What doesn't rinse away stays in the split fibre and stops it picking anything up.

DRYING
Air dry, or tumble on low. High heat fuses the split ends shut and the towel never absorbs again.

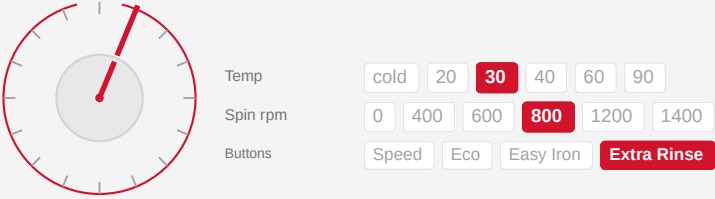

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Never fabric softener — it fills the split fibres with silicone and the towel is finished. Wash with microfibre only: the same split ends that make it absorbent grab cotton lint and never let go.

7. Dark + Black Socks + Denim

~2:00

NO SOFTENER Cottons 30 °C · 800 rpm

Cottons
1 clockwise from Off

Temp: cold, 20, **30**, 40, 60, 90

Spin rpm: 0, 400, 600, **800**, 1200, 1400

Buttons: Speed, Eco, Easy Iron, **Extra Rinse**

DETERGENT

Dark: Liquid detergent for dark/black — optical brighteners are what leave that grey haze

Black Socks: Liquid detergent for dark/black

Denim: Liquid detergent for dark/black

DRYING

Dark: Line dry inside out, out of direct sun. Skip the dryer: heat fades black fastest.

Black Socks: Line dry, or tumble on low.

Denim: Hang by the waistband and air dry. A hot dryer shrinks them and destroys the elastane in stretch denim.

WASH TOGETHER WITH
each other

NOTES

Dark: Turn everything inside out. The extra rinse matters here — detergent residue dries as grey streaks on black.

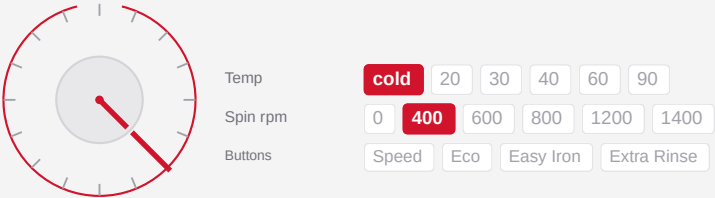

Black Socks: Same settings as Dark — throw them in that load.

Denim: Inside out, zips and buttons closed. Wash them far less often than you think.

8. Raw Denim

~0:45

NO SOFTENER Delicates / Silk cold °C · 400 rpm

Delicates / Silk
6 clockwise from Off

Temp: **cold**, 20, 30, 40, 60, 90

Spin rpm: 0, **400**, 600, 800, 1200, 1400

Buttons: Speed, Eco, Easy Iron, Extra Rinse

DETERGENT

A capful of pH-neutral or denim-specific detergent. No bleach, no enzymes.

DRYING

Hang inside out indoors, away from sun and radiators. Never tumble.

WASH TOGETHER WITH

nothing else — wash alone

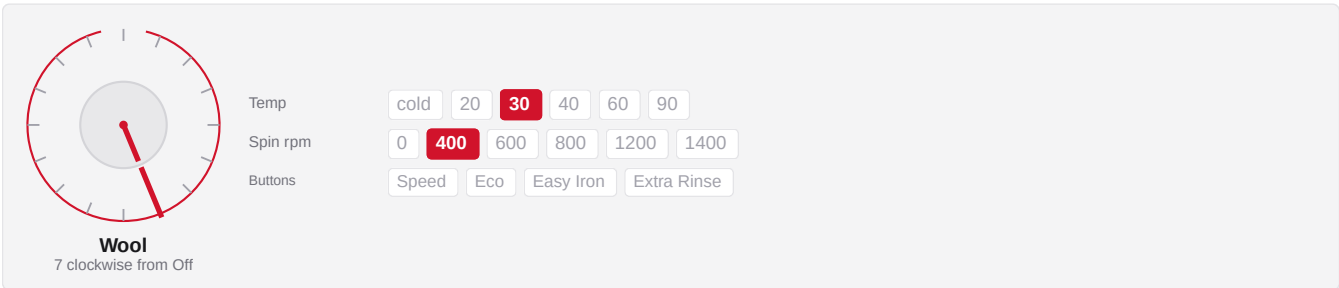

NOTES

Unwashed denim is meant to go months before its first wash. Gentler than the machine: a 45-minute cold soak in the bath, inside out, no agitation, no wringing — then roll in a towel to press the water out.

9. Merino Wool + Cashmere Blend

~0:40

NO SOFTENER Wool 30 °C · 400 rpm

The control panel for the Wool cycle features a large circular dial on the left with a red needle pointing to the 'Wool' position, which is 7 clockwise from Off. To the right of the dial are three rows of controls: 'Temp' with buttons for cold, 20, 30 (highlighted), 40, 60, and 90; 'Spin rpm' with buttons for 0, 400 (highlighted), 600, 800, 1200, and 1400; and 'Buttons' with Speed, Eco, Easy Iron, and Extra Rinse.

DETERGENT

Merino Wool: Wool detergent, half dose. No enzymes, no proteases, no bleach — they eat the fibre.

Cashmere Blend: Wool or cashmere detergent, half dose. No enzymes, no proteases, no bleach.

DRYING

Merino Wool: Never tumble dry. Dry flat on a towel, away from radiators and sun — hung up it stretches and never comes back.

Cashmere Blend: Never tumble dry. Squeeze the water out, never wring, then dry flat on a towel away from any heat.

**WASH TOGETHER WITH
each other**

NOTES

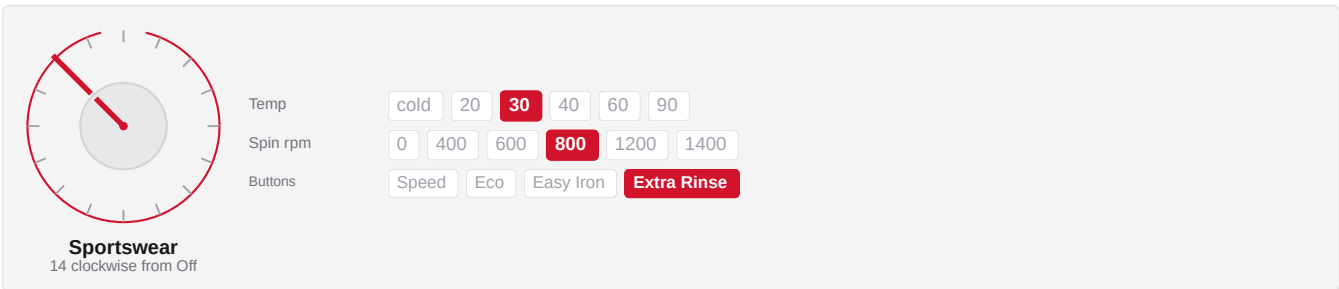

Merino Wool: Turn inside out, wash with wool only, nothing with zips. Merino barely needs washing — air it overnight and wear it again.

Cashmere Blend: Inside out, and only ever with other wool. Cashmere pills where it rubs — that is the fibre behaving normally, not a fault; a cashmere comb takes it off. Check the blend first: a little nylon makes it tougher, silk makes it more delicate.

10. Synthetic Activewear

~1:10

NO SOFTENER Sportswear 30 °C · 800 rpm

The control panel for the Sportswear cycle features a large circular dial on the left with a red needle pointing to the 'Sportswear' position, which is 14 clockwise from Off. To the right of the dial are three rows of controls: 'Temp' with buttons for cold, 20, 30 (highlighted), 40, 60, and 90; 'Spin rpm' with buttons for 0, 400, 600, 800 (highlighted), 1200, and 1400; and 'Buttons' with Speed, Eco, Easy Iron, and Extra Rinse (highlighted).

DETERGENT

A small dose of mild pH-neutral liquid detergent. Too much is what makes them smell.

DRYING

Air dry on a hanger — dry within the hour. Tumble heat kills the stretch.

**WASH TOGETHER WITH
nothing else — wash alone**

NOTES

Inside out. Never softener: it films over the fibres these rely on for wicking and stretch. A cup of white vinegar in the rinse resets a load that already smells. Covers tops, shorts and base layers — one fabric family, one wash. Mixed colours are fine in one run: at 30 °C the dyes on polyester barely move. The exception is a brand-new black or strong red piece, which can crock for a wash or two — give that its own run first.

11. Gym Socks

-1:20

NO SOFTENER Sportswear 40 °C · 1200 rpm

Sportswear
14 clockwise from Off

Temp

Spin rpm

Buttons

cold 20 30 40 60 90

0 400 600 800 1200 1400

Speed Eco Easy Iron Extra Rinse

DETERGENT
Liquid detergent, normal dose

DRYING
Tumble dry low or line dry.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Give them a 60 °C cotton run every few weeks — 40 °C keeps them clean but doesn't reset the smell.

12. Wool Trainers

-0:40

NO SOFTENER Wool cold °C · 400 rpm

Wool
7 clockwise from Off

Temp

Spin rpm

Buttons

cold 20 30 40 60 90

0 400 600 800 1200 1400

Speed Eco Easy Iron Extra Rinse

DETERGENT
A small amount of mild detergent — a wool detergent is ideal. No bleach.

DRYING
Air dry only, somewhere with moving air: outside, by a window, or in front of a fan. Never the dryer and never a radiator — heat warps the sole and shrinks the wool upper.

WASH TOGETHER WITH
nothing else — wash alone

NOTES
Pull the insoles and laces out first and wash those by hand. The shoes go in a mesh delicates bag or a pillowcase, on their own — a loose trainer batters the drum and everything in it.
